T 2
bis**

A horizontal beam of total length 3m is shown. A uniformly distributed load of 10 kN/m is applied downwards from the left end (x=0) to a point 2m from the left end (x=2m). The beam is divided into three segments: a shaded segment from x=0 to x=1m, an unshaded segment from x=1m to x=2m, and a shaded segment from x=2m to x=3m. The load is represented by a series of downward-pointing arrows within the unshaded segment.
